Valuation: <u>Naxxar Radio Link, Triq San Pawl c/w Triq Gharghur, Naxxar, Malta.</u>

In arriving at the present valuation, I have had regard for the matters described in the Valuation Report attached hereto, following inspection by myself or my appointed delegate.

The property is freehold and leased to a Tenant so that, should it be sold, any purchaser would acquire free possession thereof, subject to the terms of the lease agreement.

On the basis of the characteristics and conditions described in the Valuation Report, as well as current market trends, I estimate the value of the interest of the property in caption in its current state to be $\epsilon_{2,400,000}$ (two million and four hundred thousand *Euro*).

Valuation Report

1. Client	Malta Properties Company plc.
2. Object of Valuation	Naxxar Radio Link <i>, Triq San Pawl c/w Triq Għargħur,</i> Naxxar, Malta.
3. Proprietor	Malta Properties Company plc.
4. Compliance with Valuation Standards	The valuation has been prepared in accordance with the <i>Kamra tal-Periti</i> Valuation Standards for Accredited Valuers (2012), which are largely based on the TEGOVA Valuation Standards (2009). Any reference hereafter to the "Valuation Standards" is to be inferred as a reference to the afore-mentioned Standards published by the <i>Kamra tal-Periti</i> . Such standards are considered to be an adequate replacement for the standards and guidelines required to be adopted by the MFSA namely the valuation standards of the Royal Institute of Chartered Surveyors (RICS).
5. Capacity of Valuer	The undersigned has taken on this assignment as an External Valuer as defined in the Valuation Standards.
6. Special Conditions	This report is confidential to the Client named above for the specific purpose described below. It may be disclosed to other professional advisors assisting the Client in respect of that purpose, but the Client shall not disclose the report to any other person. Neither the whole nor any part of this report, or reference to it, may be included in any published documents, circular or statement without the prior written consent of the undersigned.
	The undersigned is responsible only to the Client and any other person making use of this valuation shall do so solely at his or her risk.
	The title of ownership has not been investigated and such investigation was not within the scope of this valuation, nor does it fall within the competence of the undersigned. The considerations regarding title are as reported to the undersigned by the Client, and any comments regarding

title are being made in order to make the Client aware of any potential issues that could affect the value or the marketability of the property. The undersigned accepts no liability in this regard.

The property value stated in the Valuation Certificate refers to the immovable things – as defined in articles 308 through 311 of Chapter 16 of the Laws of Malta – of the object of the valuation, with the exclusion of telecommunications equipment and installations within or attached to the property, even if they are so fixed thereto as to render them immovable according to law.

7. Basis of Valuation This report leads to an estimation of the "Market Value" of the property, as defined in the European Council Directive 2006/48/EC, that is, "the estimated amount for which the property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion."

Without prejudice to the foregoing, the price stated in this valuation is deemed to be the best price at which the sale of an interest in the property might reasonably be expected to have been completed unconditionally for cash consideration on the date of valuation, subject to the following premises:

- a. a willing seller;
- b. prior to the date of valuation there had been a reasonable period for the proper marketing of the interest, for the negotiation and agreement of the price and the terms of sale, and for the completion of the sale;
- c. the state of the market, level of property values and other relevant circumstances were, on the date of exchange of contracts, the same as the date of valuation;
- the absence of any additional bid by a purchaser with a special interest in the acquisition of the interest;
- a good title can be shown and the property is not subject to any unusual or onerous restrictions, encumbrances or outgoings;
- f. the property is unaffected by any Statutory Notice and neither the property nor its use, actual or

	intended, gives rises to a contravention of any Statutory Requirements;
	 g. the property is free from latent defects and no deleterious materials have been used in its construction;
	h. only a visual inspection of the property was carried out to establish the condition of repair and, unless otherwise specifically stated herein, and in that event only to the extent so specified, no parts of the property which were covered, unexposed or otherwise inaccessible to visual inspection have been inspected, and no tests have been made as to whether or not such parts are free of defects, so that the valuation assumes that a structural survey would reveal no major defects involving substantial expenditure.
8. Date of Inspection	The property was inspected on the 24 th March 2022 in the presence of a representative of the Proprietor.
9. Inspected by	Matthew Vella Critien, for and on behalf of AP Valletta Ltd., as appointed delegate of the undersigned.
10. Purpose of Valuation	This valuation has been prepared in response to a request by the Client to assess the market value of the property for the purpose of a bond issue.
11. Description	
Property Type:	The property consists of a retail unit on ground floor and offices with equipment rooms on first floor. The property also includes a plot of land on which a telecommunications pylon is erected.
Construction Type:	The building structure is typically cast in-situ reinforced concrete suspended slabs supported on load-bearing soft stone walls. The telecommunications pylon consists of a steel lattice structure.
12. Tenure	The property is freehold, as indicated in the copy of the title deed provided by the Client (refer to Annex 5).
13. Occupation	At the time of inspection, the property was leased to GO plc – the lease agreement is enclosed at Annex 6. The agreement is for an Initial Period of 10 years which commenced on the 1st January 2015, with three additional

periods of 5 years each exercisable at the option of the Tenant. The rent due is revised upwards on an annual basis in accordance with the Retail Price Index, and maintained as per the preceding year should such Index be negative.

The tenant enjoys the right, at any time during the last 12 months of the third additional period, to exercise its option to purchase the property at an amount equivalent to the capitalisation at 6.0% of the rent due during such period.

It is understood that the Tenant is currently sub-leasing part of the property to a third party. A copy of the relevant agreement was not provided to the undersigned.

The Client has advised the undersigned that the Tenant has opted not to extend its current lease. The property will be vacated by both the Tenant and the sub-Tenant by the end of December 2024.

14. AgeThe part of the land where the building is situated was
acquired by the Government of Malta in 1962 and the
building was already in existence when the Telemalta
Corporation Act was enacted in 1975. The building also
appears on the 1968 official survey sheet for the area.
Therefore, it is reasonable to assume that the age of the
building is over 55 years old.

15. Location

- Aspect: The property is situated within a fairly busy area on the outskirts of Naxxar and close to the village centre.
- Surroundings: Surrounding properties immediately adjacent to the property under review are primarily residential in nature, while properties across the road on *Triq San Pawl* are primarily commercial in nature at ground floor level, with overlying residential properties.
 - Amenities:Being close to the village centre and located on a busy
main road, the property is within direct access of most
common amenities including public transport routes,
shopping facilities, places of worship and banking facilities.
- **16. Common Areas**The property does not share any facilities with third
parties. The party walls are assumed co-owned in equal
parts with the owners of the adjacent properties.
- **17. Local Authority** Naxar Local Council.

19. The Site

Boundaries:	Site boundaries of the property are clearly defined by party walls on two sides, with the third side being defined by a boundary wall onto <i>Triq Għargħur</i> . The fourth side, that is the boundary between the property and <i>Triq San Pawl</i> , is not clearly defined on site – the Client informed that the parking area lying immediately outside the property along this road forms part of the property, however its extents are not physically indicated on site, and this area is currently used for public parking. For the pupposes of this report it is being considered that the property under review, and a value has been attributed to such area.
Physical Characteristics:	The site is situated on level ground with no known unusual characteristics. A ground investigation was not carried out, and no details were provided by the Client as to any such investigation carried out. This valuation therefore assumes that any technical investigations would not reveal any ground conditions that would have a significant impact on the value of the property, including but not limited to fissures, the presence of clay, and ground contamination.
	The site has a frontage of approximately 29m on <i>Triq San Pawl</i> and of 39m on <i>Triq Għargħur</i> . The total superficial area of the site in question is approximately 1,370m ² (including the public parking area) and, because it is situated on high ground, it is not prone to flooding.
Easements:	As informed by the Client the property was acquired on the Title Deed as free and unencumbered and as free from any ground-rents, burdens, servitudes, hypothecs, privileges, charges, cautions, any rights, both real and personal, in favour of third parties, expropriation, requisition, enforcement orders and litigation.
	No signs of any easements were observed. The Client has no knowledge of the existence of any easement.
Hypothecs – Privileges:	As informed by the Client the property is subject to the following hypothecs.
	• H. 23238/201: General Hypothec on all the property of MPC as principal debtor and on all the respective properties of MCB, SLM, SPB and ZTN as joint and several sureties. Special Hypothec on:

The Client did not inform of any other General Hypothecs registered against the Proprietor and no other Special Hypothecs and / or Special Privileges burdening the property.

20. Roads Triq San Pawl and Triq Għargħur are made up and surfaced with tar macadam, which is in a good condition. Adjacent roads are also made up and surfaced. The street and adjoining access roads have street lighting and trees installed.

21. Planning Considerations The property falls under the requirements of the Central Malta Local Plan (CMLP) published by the Malta Environment and Planning Authority (MEPA), which has now been succeeded by the Planning Authority (established in 2016).

The property falls within the Development Zone. The allowable building height is of two floors plus underlying semi-basement, as further defined in the Development Control Design Policy, Guidance and Standards 2015 (DC15). Annex 2: Interpretation of Height Limitations of DC15 defines the maximum allowable height to be 13.5m.

The property lies in an area classified as a Residential Priority Area under Policy CG08 which states that "Residential Priority Areas are generally used exclusively for residential purposes. RPAs are distinct from other urban areas because of the particular building design of the existing semi-detached/detached dwellings and bungalows, lower densities and appreciable landscaped areas within individual sites. These areas can be extensive such as in the case of Naxxar and Iklin... The proliferation of non-residential uses within these RPAs is likely to have a serious impact on their particular residential character and amenity, and is therefore not permitted by MEPA."

It is noted that the uses of the property under valuation, as offices, equipment rooms, retail space and a telecommunications pylon do not fall under the permitted uses outlined in the policy. Notwithstanding this, a number

of planning permits have been granted and issued for this site with its current uses, as outlined below.

The site is located across the street from a Local Town Centre which has a concentration of convenience shopping facilities serving the surrounding residential area (Section 3.5.6 of Policy CG13 – CMLP), and is within walking distance of the Primary Town Centre where a broad range of facilities are located including retail, offices, places of worship, bank facilities, etc.

A number of applications for development permission on the site were submitted over the years. The following were traced on the website of the Planning Authority, which has succeeded the MEPA in its planning function:

- PA/02603/95: To carry out alterations and erect an extension to existing façade; Permission Granted (October 1995)
- PA/04387/99: Insertion of ATM in existing facade including externally illuminated sign (November 1999)
- PA/03972/02: Extension to Naxxar Radio Link premises by the addition of two rooms on two existing floors; Permission Granted (August 2002)
- PA/06512/06: 15m extension to the existing tower; Permission Granted (*May 2007*)
- DN/00501/08: Internal Alterations; Permission Granted (June 2008)
- PA/03767/08: Alterations to façade including an ATM and sign; Permission granted (*March 2009*)

Copies of the above-mentioned permits were not made available to the undersigned, and therefore no comment can be made regarding the compliance of the property with such permits.

The permit with reference PA/03767/08 has been downloaded by the undersigned and is included in Annex 5. It appears that the property's layout is generally compliant with said drawings. Any internal variations such as shifting of internal walls or glass partitions are considered to be minor in nature and sanctionable through the relevant planning procedure.

The use of the property according to the permit is that of offices on the upper floor, and retail together with offices

on ground floor. The use of the property at the time of inspection was in line with this permit.

It is to be noted, nevertheless, that there does not appear to be any enforcement action on the property.

Since the existing building already had, until recently, a committed commercial use (retail and offices) and a number of planning permits have been issued endorsing such uses, it is being considered that this part of the site would retain a commercial use. Since these areas are currently vacant, it would be advisable to ensure that any active trading licences on these areas are maintained in order to extend the continued legality of these areas for such use. Failure to maintain such licences may result in the loss of commercial permit, in view of the fact that the property is located in an area zoned as a Residential Priority Area. Similarly, once the Tenant and sub-Tenant vacate the property.

The rest of the site on which the pylon and other equipment currently stands is, for the purposes of this valuation, being considered as vacant land available for development for residential use as per guidelines put forward by the CMLP following the vacation of the property by the Tenant and sub-Tenant.

22. Statutory considerations There does not appear to be any infringement of current sanitary regulations.

23. Building Services This is not a condition report. A visual inspection has been made of the readily accessible services. No tests have been made.

24. Components, Finishes and Condition of Repair

This is not a condition report. No surveys or inspections were made of unexposed or inaccessible parts of the structure. However, the following were noted by visual inspection:

The structure appears to be in good condition. However, a crack was noted above the lintel of one of the internal doors at first floor. Finishes are generally of average standard throughout the property, with the area used as a retail space having a higher standard of finish than the rest of the property.

Finishes in the retail area include ceramic tile flooring and suspended ceilings installed throughout. The walls are finished in gypsum or fitted with profiled wall panelling. The walls appear to be recently painted. The apertures are in aluminium and single glazing with a screening film fixed to all glass openings reducing the heat gain within the shop.

The finishes at first floor level can be considered dated and include ceramic tiles and laminated parquet flooring in the offices and vinyl flooring in the equipment rooms; suspended ceilings in the office areas and painted ceilings in the equipment rooms; some aluminium partitioning; and the main staircase leading up to first floor level is clad in marble. External apertures are in aluminium and glass. The roof is covered in a torch welded membrane. The exterior of the building is plastered and painted with areas of the upper parts of the front and back elevation, as well as the boundary wall, requiring maintenance due to flaking paint.

Workmanship is of a good quality throughout. All the building services described previously appear to be in good working order.

25. Environmental Considerations

The main building is exposed on all sides and therefore is subject to solar gains throughout most of the day. The property does not include any energy-saving aspects that could be detected during the inspection carried out.

26. Valuation Methodology The market value of commercial property is calculated on the basis of the income approach. A Discounted Cash Flow calculation has been applied. This method is based on a yield during a period under review. The yield is realised by making an investment on the date of valuation in order to subsequently receive cash flows during the period under review at times also referred to as the holding period. The discount rate for subject property is equal to 5.50% which is estimated on the basis of the yield on long-term government bonds (risk-free return), increased by a risk premium that reflects the degree of risk of the property itself and the rate of inflation.

The cash flows consist of projected rental income less rental tax, maintenance, any renovation costs and a final value at the end of the period under review. During the period under review concerned, account is taken of periodic price increases such as the indexation of the rent and cost increases. The expected market rent is likewise subject to inflation.

As indicated by the Client it is understood that the premises will be vacated by its current tenant and subtenant by December 2024. In the applied DCF it is being assumed that the plot of land currently occupied by the telecommunication pylon will be vacated and sold in vacant state with the purpose of being redeveloped towards residential use. The value of said plot has been based on the residual value of residential redevelopment. The remaining parts of the property which consist of the retail and office space along *Triq San Pawl* are assumed to be refurbished upon vacation by the tenant and re-let at market rates for the remaining period under review.

The final value is determined on the basis of the cash flow and an expected exit value in year 11. The exit value relates only to the commercial parts of the property given that the revenues of the plot, which is assumed to have been sold, forms part of the 10-year cash flow period

27. Impact of COVID-19 The outbreak of the Novel Coronavirus (COVID-19) was declared by the World Health Organisation as a "Global Pandemic" on 11 March 2020, and has impacted global

financial markets. By virtue of Legal Notice 115 of 2020, and in accordance with Article 14 of the Public Health Act, the Superintendent of Public Health declared that, with effect from the 7 March 2020, a public health emergency exists in Malta in terms of COVID-19. Travel restrictions have been implemented by many countries, including Malta, and many market operators were made to shut down or restrict their operations in line with the relevant legal instruments.

Market activity has been impacted in many sectors. In view of the situation, Malta is currently experiencing an uncertain and unpredictable real estate market. This has led to valuation uncertainty which is not measurable, because the only inputs and metrics available for the valuation are likely to relate to the market before the event occurred and the impact of the event on prices will not be known until the market has stabilised.

This valuation is therefore reported on the basis of 'valuation uncertainty' as defined in the European Valuation Standards 2016, and in line with the *Kamra tal-Periti* Valuation Standards COVID-19 Guidance Note (May 2020). While the estimated value is considered to be the best and most appropriate estimate based on the available information, it is the opinion of the undersigned that less certainty – and a higher degree of caution – should be attached to this valuation than would normally be the case.

Given the unknown future impact that COVID-19 might have on the real estate market, it is recommended that the Client keeps the valuation of this property under frequent review.
